THE steamer Guthrie has among her passenger a number of tourists who are making a round trip from Sydney to Japan and back. The excursion is under the guidance of the world-known frm. Messrs Thos. Cook and Son. According to the original plan of the voyage the steamer was to call at Sandadan, but the delay caused by the picking up of the Manmuir prevented this The deviation, however, enabled them to visit Sourabaya, which they considered ample compensation. A stay of four days going and four days coming back is to be made in Hongkong, which will permit the excursionists to visit Canton and Macao. Ton days are allowed in Japan, during which time they should be able to visit the most interesting places. It is possible that on the return journey a call will be made at expected here on or about the 28th Sandakan. The passengers speak highly of the kindness of Captain Green, to whom they presented a purse of sovereigns and an address on the arrival of the Guthrie in Hongkong, Mr W. J. THE naval manceuvres at Tytam Bay last week took the form, we understand, of a sham fight in which the Imperieuse, assisted by one of the smaller gunboats, was the defending ship, and succeeded in holding her own against an attacking fleet of four vessels. The Imperieuse, which took up a position in the bay, was protected outside by a getting near her without first destroying the mines. The destruction of the mines was of course attempted. A lighter, carrying counter-mines for this pur pose was captured by the defenders boats, and in the cutting away of the Corres of the Address to H. R. H. the counter-mines one of the salors had a Duke of Connaught are lying for signature linger chopped off. The enemy's torpedo: at Messra Lane, Crawford & Co.; Messra boats, being able to get over the line of mines without danger, made several attempta to accomplish the destruction of the flagship, but without success. One of these craft fouling a cable with her Saturday evening. An entire change of propeller, had her shaft bent and became an easy prize. Another torpedo boat, which was nearly run down by the Imperiouse, sustained some damage. The weather was very thick for some time, and the despatch vessel Alacrity, which brought out the Admiral from Uongkong, damaged her stem by touching a rock. The electric light was, we believe, used very effectively in the operations.

Ma Robinson, Acting Police Magistrate, inflicted a well-deserved though by notime. Meantime we must pay at once the cook by Mr H. E. Denson at Kowloon, and the charge sgainst him was that of creating a disturbance in his employer's house. Mr cers' Mess to morrow evening, commencing just been engaged as an areab by Mrs Denson, and sho afterwards sent notice that she would not come to the house. The defendant admitted the charge. JAPAN. BE LACQUER FOR SHIPS' BOTTOMS .-The uses to which the Japanese put the lacquer for which their country is calebratad are very numerous both frost an artistic and an industrial point of view. High class artistic work is most expensive, and only rich people can afford to indulge in it, the o'der work capecially being highly prized. For domestic and industrial purposes the transformations which can be worked on paper and wood by the application of lacquer are very wonder'nl, and render it 'most indispensable for ordinaryuse. Some few years ago the Japanese Government decided on lacquering the bottoms of all their iron ships, and the results proved that corresion was most effectively prevented, but the process does not seem to have been applied to any foreign ship until about two years ago, when the attention of the captain of a Russian frigate was directed to it, and lacquer was applied both to the iron and the zine parts of the bottom. To the latter it was found that the adhesion of the lacquer was very slight, but on the iron, or rather steel, it was found that it was in an extraordinary good state of preservation, so much so that it could not be stripped off except by being scraped with a sharp instrument, and from the experience thus gained it has been decided to substitute iron on the part where zinchad been used. It would be interesting to hear the result of an experiment on the bottom of a British warship, and it might be worth the while of living, with considerable rak-should not

More wary persons than this push ing and struggling assemblage had studied with our Mr. Matthew's statement that the report would first be available at the sale office, a department in another portion of the building, and it was there, indeed, that copies were to be had punctually as Big Ben boomed forth the hour of ten. As the favoured ones hurried through the lobby with their speil, a large bundle of the volumes was brought in on the back of a messenger for the purposes of the vote office; but owing to the door, as previously explained, being locked, there was a momentary delay, during which the bundle was snatched from his shoulders, and copies were seized by a struggling crowd which had temporarily lost all sense of dignity in its desire to seize the report. There was then a rush in all directions with the news. While the members were struggling round the vote office the Irish wembers were not satisfied with their position, for a number of Conservatives were in front and would get the first cop es, accordingly the Irishmen derised a ruse which left chem m's'ers o'd times, but to decide whather or not he of the situation. MORE ABOUT THE PROPOSED TAX

To the Editor of the 'CHINA MITE.' Hongkong, March 24. Sin, - Most people will agree with your correspond nt. Merchant, in thinking that if sharebrokers are to be saddled with

a tax, most assuredly a similar burden

ought to be imposed upon bill-brokers.

He refers with praceful appropriateness to that time-honoured aphorism having reference to the applicability of sauce to geese generally without regard to gender, but the beauty of diction and force of argument are rather marred by the introduction of what has some alight resemblance to venom. Had he not adopted the nom de plume 'Merchant' I should be inclined to think that he is himself a sharebroker.
